

ALI ASGHAR

SOFTWARE DEVELOPER

 [@aliasghar37](#)  [@aliasghar37](#)  [aliasghar.dev](#)  iamaliasghar37@gmail.com  +923008076815

Proactive Software Developer and final-year IT student at QUEST, trained from professional training programmes from IBM and Meta. Expert in the MERN stack and Next.js with a growing specialization in RAG-powered applications using AI SDK and LangChain. Passionate about bridging the gap between backend architecture and intuitive user experiences.

TECHNICAL SKILLS

JavaScript, HTML, CSS, React.js, Next.js, Redux Toolkit, Node.js, Express.js, MongoDB, Git, GitHub, Redis, Docker, Figma

PROJECTS

Natours: Full-Stack Tour Booking Platform | *Node.js, Express.js, MongoDB* [Docs](#) [Live Demo](#)

- Developed a backend Rest API for a tour booking platform, managing complex data models for tours, users, and reviews.
- Implemented secure authentication and authorization protocols, including password resetting and JWT-based session management.
- Integrated MongoDB Atlas for database, Supabase for cloud storage and Stripe for payments.

Pizzeria: Pizza Ordering Website | *React.js, Vite, React Router, RTK, Local Storage* [Live Demo](#)

- Built a modern, responsive pizza ordering application featuring a seamless UI for menu browsing and cart management.
- Developed a multi-stage checkout process including Home, Menu, Orders, and Cart routes using React Router for optimal navigation.
- Integrated map for branch locations using react-leaflet and dynamic credit card form with react-credit-cards-2.

Forkify: Recipe Application | *JavaScript, HTML, CSS, MVC Architecture* [Live Demo](#)

- Architected a frontend recipe application allowing users to search over 1,000,000 recipes,
- Enabled features for recipe creation, dynamic ingredient adjustments (servings) and a "bookmarking" system using local storage.

EDUCATION

Bachelor of Information Technology Dec 2022- Present
Quaid-e-Awam University of Engineering, Science & Technology, Nawabshah

PROFESSIONAL CERTIFICATES

- **IBM Full-Stack JavaScript Developer** ([verify](#)).
- **Meta Front-End Developer** ([verify](#)).
- **Google IT Support Specialist** ([verify](#)).

AWARDS

2nd Prize in "CodeMaster Solo Showdown Challenge" powered by *Excelebrate* ([verify](#))

- Delivered a responsive, user-centric weather application with search and location features, allowing users to view current temperature, humidity, wind speed, forecast for coming hours/days and more. Handled multiple APIs provided by OpenWeather.
